

Alarm System Planner

Number of sensors needed

-Think about where you need movement sensors.

Consider;

- the main rooms containing valuables eg lounge, TV room, Study, Master Bedroom etc

-which windows/external doors are hidden from neighbours' view and easy to reach

-for example, placing a sensor in the hallway (rather than individual rooms) if individual rooms off the hallway would be of little or no interest to an intruder

-if one sensor could cover lounge plus hallway instead of using two separate sensors

-what's in the garage (besides the car)lawnmower, power tools etc.?

.....so now, Total movement sensors _____
Total door/window switch sensors _____

Any Wireless sensors needed?

Consider if cabling is difficult or seemingly impossible to any of the proposed sensor locations.

If so, is there a satisfactory alternate location where cabling is possible?

If not, then number of Wireless movement sensors _____

Number of Wireless door/window switches _____ (included Totals above)

Location of other components

Where will you locate the

-internal piezo siren(s)

-codepad(s)

-and importantly, the main control cabinet. Consider wiring access out to each of the components, including power point for the transformer plug, access to the telephone line* (where applicable)

Floor to ceiling cabinets are handy eg linen closet, built in 'robe etc.

.....Your Shopping List Summary.....

("Your choice" of starting kit type) _____ 1
Plus Additional;
Codepads (Specify D8 or L8) _____
Screw connect type Reed (magnetic contact) switches _____
PIR (Passive infrared) movement sensors _____
Internal piezo screamer sirens _____
Outside siren/cover/tamper switch/strobelight assembly _____
100m rolls of 4 core cable _____
100m rolls of 2 core cable _____
D8 wireless radio receiver/interface,
(required for wireless functions on D8 models only) _____
R12 wireless PIR sensor, 12 metre range (D8 & R8 models) _____
Ness wireless PIR sensor, 15 metre range (D8 & R8 models) _____
Keyfob type wireless remote control & panic button (D8 & R8 models) _____
Wireless Reed (magnetic contact) switch (D8 & R8 models) _____
Wireless Smoke detector (R8 & D8 models) _____
Wireless Codepad (R8 & D8 models) _____
Wireless Doorbell (R8 models) _____
